

Redemptive Education NEWS

Thankful for another year of biblical, relational, integral & experiential learning

Redemptive Education principles are striking a chord worldwide

Just as American parents and educators have been seeking more effective approaches to education, many others around the world are also hungering for change from failed paradigms. A Christian educator in **Australia** writes, "In my 30 year journey in Christian K-12 schooling, I have been growing increasingly dissatisfied with the current schooling paradigm and have been drawn to a vision of a more personalized approach to education. I came across your (Amy Imbody's)

book, *Wind from the Sea* and looked up your website for the Center for Redemptive Education. I have just read *The Quest to Align with God's Design for Teaching and Learning*, too. Your work, along with others, has led me to a real interest in what you are doing." The Center for Redemptive Education has been equipping educators in its *biblical, relational, integral and experiential* principles in countries including **China, India, and Lithuania**. May God help us continue to learn and spread His principles for education.

SUPPORT

Wind from the Sea: essays

"The very first lessons humankind encountered were in a garden tailor-made for their education and enjoyment. God infused the entire creation with expressions of His beauty, His power, His character. It is out in the natural world that children are most able to thrive and grow."

--from essay #10, [Wind from the Sea](#), by Amy Imbody
